KHS Innocoll KS 1799

^{*}example illustration

adhesives for labeling

- based on casein / protein
- for glass
- for paper / stanniol
- high intitial tack
- good resistance to condensate water
- for wet, dry and warm filling till approx. 40 °C

product characteristics

The product is suitable for applying labels to normal - and lightly - coated glass surfaces, e.g. in the beverage-, foodstuffs- and pharmaceutical industries etc; usable for wet, dry and warm filling till approx. 40 °C. The product has a good resistance to condensate water and has a good initial tack; can be easily removed in a automatic bottle washing machine under normal industrial conditions.

application notes

The temperature processing range is 26 - 35 °C, ideal at approx. 29 °C. Before a different adhesive is to be used on the machine, it must be carefully cleaned.

storage

The product can be stored in its original sealed container for at least 6 months at room temperature after date of production - but not below +4 °C.
